TNR Delivers Rugged Durability

Established in 2003, TNR Industrial Doors provides high performance doors for industrial and commercial applications. In 2007, TNR purchased their Canadian competitor making them the only Canadian supplier of rubber roll up doors.

TNR's door design redefines the industrial roll-up door. These doors are extremely durable, flexible, easy to install, easy to maintain and able to withstand high impact incidents. Some of TNR's door designs include roll-up doors that go beyond 40 feet in width , over 35 feet in height and are virtually indestructible. They are specifically designed to perform in severe conditions such as torrential rain, blizzards, and extreme temperatures.

Outstanding leadership, great customer service, and product excellence, have made TNR the manufacturer of choice for rubber roll-up doors. Since inception, TNR has grown its revenue at an average of 25% per year. In fiscal 2009, TNR experienced its best year in both revenue and profitability.
